DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

ART REJECTION:

Claim Rejections - 35 USC § 103

2. Claims 1-3,5-16, and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lutes in view of Mozer for the reasons of record as discussed in the previous office action.

3. Claims 4 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lutes in view of Mozer as applied to claims 1 and 14 above, respectively, and further in view of Puchek et al for the reasons of record as discussed in the previous office action.

REMARKS:

Response to Arguments

4. Applicant's arguments filed 11/21/03 have been fully considered but they are not persuasive.

APPLICANT'S ARGUMENTS:

1) "When making an obvious rejection under 35 U.S.C. 103, a necessary condition is that the combination of the cited references must teach or suggest all claim limitations.....Consequently, the present invention is not obvious in view of the Examiner's proposed combination."

Art Unit: 2632

6. EXAMINER'S RESPONSE:

1) The applicant is asserting that the combination of references used in the art rejection does not read on the claimed subject matter because all claim limitations are not met by that combination. The applicant further goes on to summarize the functions of the circuit of Mozer by listing the functions of the circuitry of Mozer, in an attempt to provide an example of why Mozer would not have compensated for the deficiencies of Lutes, in view of the claimed subject matter.

Although applicant has correctly listed a number of functions of the circuitry of Mozer, the applicant has left out the most important function, and the main reason why Mozer was combined with Lutes for the purpose of rejecting the claimed subject matter. Contrary to applicant's assertion, the circuitry of Mozer does perform comparing and matching functions based on entered user codes with stored codes in the form of script processing(see: column 5, lines 7-19).

Mozer teaches user code recognition, comparing, and matching in the form of audio signal recognition, which inherently includes matching and comparison functions. Furthermore, the user customizable screening query(see: Mozer, column 5, lines 38-45) are, as well, a form of code comparing and matching, since specified speech signals received would have been required in order to produce specified messages responses, which basically is a form of code recognition wherein the speech signals are the entered code. Even the applicant utilizes sound as the user code as disclosed in claim 5, which is dependent on claim 1, and therefore includes all of the limitations thereof.

Art Unit: 2632

In conclusion, the examiner contends, how can the applicant accuse Lutes in view of Mozer as not meeting the limitations of the claimed subject matter due to the assertion that the combination does not teach all of the claimed subject matter, when Mozer clearly teaches use of logic circuitry that performs comparing and matching function which perform in the same manner as that in the claimed invention? In view of this, the applicant's arguments are not deemed persuasive.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
